Name	Price	Description
Rice Test	£ 5.99	The Rice Test Demonstrates fixation problems in an immediate and engaging manner. (Fixation disparity and suppression).

Comparative Reading Speed Test (CRST) ®	£ 69.00	Comparative Reading Speed Test (CRST) ® A test to measure the rate of reading randomised individual characters (letters) which uses both high and low contrast serif and non-serif letters rather than sentences or individual words or numbers.
--	---------	--

- ☑ May distinguish between 4 separate groups :
- ☑ visual deprivation and amblyopia
- ☑ pattern glare induced by poor binocularity
- ☑ the need for a routine follow-up on learning difficulties
- ☑ potentially high achievers.

☑ stopwatch and literature included.

Dynamic Fixator Test Mk II® : Full Kit	£ 139.00	Diagnostic test for dynamic fixation. Improved version Mk II. Evaluates the ability to move the eyes rapidly from one position of gaze to another. Deficits can affect concentration and relaxation. Speed of eye movement, accuracy, endurance, consistency and mental strategy may all be indicated by the results of this test. Includes stopwatch.
---	----------	--

This test is supplied in an A1 artists portfolio case suitable for storing all the wall charts.
